|           | Camp                     |               |

**Rationale** Why are there 32, rather than 26, routes?

As each route should have a similar number of teams, 16 pairs of routes have been devised - 9 at 35 miles, 5 at 45 miles and 2 at 55 miles - 32 routes in all. This allows Route Allocation in late April with the requisite flexibility to allocate the number of routes broadly pro-rata to the teams entered at each distance, resulting in similar numbers of teams per route whilst retaining the A to Z sequence.

**Key**

The numbered Tors are in **BOLD** text and the Vias are not; both are mandatory on the route in question, irrespective of whether they are Safety Controls [SC] or Checkpoints [CP] per the Ten Tors Rules.

The route times are calculated with **River State AMBER** being normative for Dartmoor.

**35 mile routes** - NT [Night Times] = 3kph + 1 min/10m height gain, rounded to the previous whole 10 minutes - e.g. 1849 = NT1840 - to enhance the safety margin.

CT [Crash Times] = 3.75kph + 1 min/10m height gain, rounded forwards to the next whole 10 minutes - e.g. 1451 = CT 1500 - adding a little extra completion time.

**45 mile routes** - CT [Crash Times] = 4kph + 1 min/10m height gain, rounded forwards to the next whole 10 minutes

**55 mile routes** - CT [Crash Times] = 4.5kph + 1 min/10m height gain, rounded forwards to the next whole 10 minutes
